

Choroidal nevus vs. malignant melanoma																			
Corneal Foreign Body																			
Vitreous Hemorrhage																			
endophthalmitis																			
old retinal detachment repair																			
asteroid hyalosis, vitrectomy consideration																			
ruptured limbal sutures																			
ectopic pupil secondary to peripheral anterior synchia																			
Chalazion																			
Orbital Pain																			
Thygeson's Keratitis																			
Blepharochalasis									1										1
Iris melanoma																			
Herpes Simplex Keratitis																			
Amblyopia																			
Bell's Palsy																			
Basal Cell Carcinoma																			
Hollenhorst plaque, emboli lodged in retinal arteriole																			
Calcific Band Keratopathy																			
Disciform Keratitis																			
Proptosis, unilateral or bilateral																			
Conjunctival Vascular Lesion																			
Contact Lens Fitting for Anisometropia																			
Phthisis																			
Hordeolum																			
Orientation & Mobility Training:																			
Macular Dystrophies																			
Limbal Dermoid																			
Keratitis, secondary to contact lens overwear																			
Isolated cotton wool spots																			
Retinitis Pigmentosa																			
High Myopia, CL intolerance: Intra-ocular Contact Lens																			
Elevated Sub Retinal Mass Lesion																			
Epi-retinal Membrane																			
Visual Therapy for a General Binocular Dysfunction																			
plaquenil macular toxicity																			
hypertensive retinopathy																			
systemic assessment / treatment for high cholesterol																			
speciality contact lens fit for congenital aniridia																			
work up for chronic progressive external ophthalmoplegia																			
treatment for an inflamed pterygium / pinguecla																			
dry eye syndrome / punctate keratitis																			
trichiasis																			
Graves Ophthalmopathy																			
uni/bilateral retinal microaneurysms w/o known cause																			
recurrent sub-conjunctival hemorrhage/systemic evaluation														1					1
suspicious lid lesion, cancer?																			
un-explained visual field loss, systemic work up needed																			
recent constant headache w or w/o neurological company																			
work up for un-explained vision loss																			
work up for hemi-facial spasm																			
severe non-proliferative diabetic retinopathy																			
xanthelasma																			
myopia control
