

Vitreous Hemorrhage																				
endophthalmitis																				
old retinal detachment repair																				
asteroid hyalosis, vitrectomy consideration																				
ruptured limbal sutures																				
ectopic pupil secondary to peripheral anterior synchia																				
Chalazion																				
Orbital Pain																				
Thygeson's Keratitis																				
Blepharochalasis																				
Iris melanoma																				
Herpes Simplex Keratitis																				
Amblyopia																				
Bell's Palsy																				
Basal Cell Carcinoma																				
Hollenhorst plaque, emboli lodged in retinal arteriole																				
Calcific Band Keratopathy																				
Disciform Keratitis																				
Proptosis, unilateral or bilateral																				
Conjunctival Vascular Lesion																				
Contact Lens Fitting for Anisometropia																				
Phthisis																				
Hordeolum																				
Orientation & Mobility Training:																				
Macular Dystrophies																				
Limbal Dermoid																				
Keratitis, secondary to contact lens overwear																				
Isolated cotton wool spots																				
Retinitis Pigmentosa																				
High Myopia, CL intolerance: Intra-ocular Contact Lens																				
Elevated Sub Retinal Mass Lesion																				
Epi-retinal Membrane																				
Visual Therapy for a General Binocular Dysfunction																				
plaquenil macular toxicity																				
hypertensive retinopathy																				
systemic assessment / treatment for high cholesterol																				
speciality contact lens fit for congenital aniridia																				
work up for chronic progressive external ophthalmoplegia																				
treatment for an inflamed pterygium / pinguecla																				
dry eye syndrome / punctate keratitis																				
trichiasis																				
Graves Ophthalmopathy																				
uni/bilateral retinal microaneurysms w/o known cause																				
recurrent sub-conjunctival hemorrhage/systemic evaluation																				
suspicious lid lesion, cancer?																				
un-explained visual field loss, systemic work up needed																				
recent constant headache w or w/o neurological company																				
work up for un-explained vision loss																				
work up for hemi-facial spasm																				
severe non-proliferative diabetic retinopathy																				
xanthelasma																				
myopia control																				
hyphema																				
United States																				
Mexico
